Control Campaigns in

SPOTLIGHT MANAGER

You can drag and drop approved campaigns and spots into your circuit calendar's respective free program loop and then specify the desired broadcast period.

The color coding allows you to see which spot is in which loop broadcasted, how long the respective broadcasting period is, and which slots are still available. This way, you can always keep track of your campaigns.

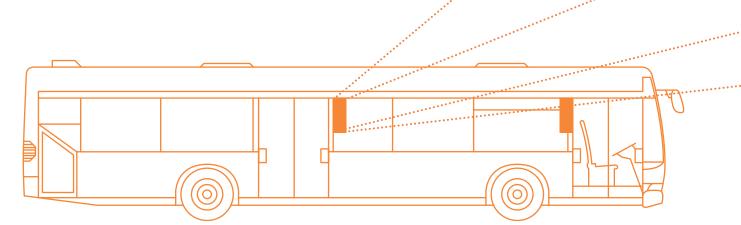

Placeholder in

SPOTLIGHT MANAGER

Even if you don't post a current offer your booked slot will not remain empty.

With a placeholder spot, these idle times can be automatically filled by us until your campaign is ready. As soon as you create a new campaign, we will replace the placeholder with this one.

This way, there is no gap in the booking period, and your customers are constantly referred to you.
